Page 2 of 3

- Responsible for maintenance and support for the analysis and reporting application. Automation of data mapping process through creation of generalized macros.

## **Assistant Systems Engineer**

Tata Consultancy Services

Sep 2011 - Sep 2013 (2 years 1 month)

It's a web application project developed to automate the internal audit process of the company. In the drug development process, many studies and compounds are involved after the successful completion of the study, all required documents need to submit so that compliance of the study is fulfilled. As a solution provider, we have automated that process by fetching the details from multiple databases. Also, provide an interactive user interface to generate a report of studies on the basis of different criteria to track their status.

## **Education**

**Institute of Engineering and Technology**

Bachelor of Technology, Computer Science

2007 - 2011

## Skills

SAS Programming • Tableau • Hive • Data Analysis • Reporting & Analysis • Teradata SQL • Risk Analytics • Credit Card Analytics • Banking • Alteryx
