👤 Summary

I'm a React.js developer, I have experience in developing front end for different kinds of websites using React and Scss, which is completely responsive currently working wth ACG world as a react.js developer. I also love working with CSS animation libraries and integrating different JS libraries in the code to make the workflow easy.

🎓 Education

2018 - 2022

B.E Computer Engineering

I'am current pursuing my computer engineering degree, currently studying in third year looking for some great internship opportunities.

👨‍💼 Experience

Excursify India Pvt Ltd
01/2020 - 04/2020

Angular.Js Developer

This was a 4-month internship in which I had to develop the front end of the website this was a Delhi based startup. Angular.js was used in which there were several other libraries for animation and scss was used as a preprocessor for css. .

ACG Wolrd
02/12/2020 -

React.Js Developer

I'm working as a React.js developer mainly working with the frontend. This project is all about developing their main website which includes Iot integration in the website, which will show all the data of the machines live on their website.

Awards
My application was selected for the finals in smart india Hackathon 2020.
This application was based on ML and integrated with an web App.

Skills
HTML
CSS
JavaScript
Scss
React.js
Redux

Languages

Projects

Personal
Natours

03/2020 - 04/2020

I made this project while i was going deep with css and its preprocessor SCSS.
I used scss and developed the whole Front-End for this website

Personal
Recipe Application

04/2020 - 05/2020

This is an Recipe application in which the data is comping form an external API . I made this project to understand more about webpack, Babel and more of Es6 features.

Personal
Realtors

05/2020 - 05/2020

This was an Front-End websites designed for an Real-Estate broker. In this there was flexbox and Grid used together.

Personal
Clothing Store

05/202 -

This is an E-Commerce store that is fully made with React.js and Hooks with Redux at some places for state-management. I have also used stripe-API for payments integration and styled-components for component-based CSS, at the end it is also hosted with Heroku.
