PROFILE SUMMARY

As a software developer with over 5 years of experience, I have worked on multiple projects across various industries such as government, blockchain, education, data visualization, and food. My expertise lies in front end development with ReactJS, NextJS and Javascript . I have been instrumental in developing robust web-based platforms and conversational assistants for various clients. My skills include diagnosing, debugging, and resolving bugs in production systems, as well as producing system design documents. I have a strong command over JavaScript, React.js, Nodejs. I am also proficient in using the GIT version control system tool. I have a proven track record of working effectively both as an independent developer and as part of a team.

EDUCATION HISTORY

- Telugu

PROJECTS

FanCode, 3 Months

I have worked on features like video streaming and other e-commerce related front end development.

SRIF, 4 Months

A govt of Jarkhand project for university's maintenance and ranking system.

NESDA, 7 Months

A project by the Ministry of Personal, Public Grievance, and Pensions to detail the National eServices Delivery Assessment (NeSDA). This assessment helps the States and UTs to identify areas of strength and challenges in e-Governance Service delivery and outline future policies and strategies in these areas.

NFT Market place, 14 Months

It was a client project where we were developed a e-portal for sale and creation of NFT images and integrated web3 tech like blockchain, Ethereum, and rinkey test network and also Implemented Metamask Wallet.

Project Assessor, 11 Months

I have worked from scratch on this project with private routing based on user, dashboard, responsiveness with fully adhering to UX design provided. Learned and worked on new dependencies like powerbi-client-react and D3js. Worked on integration of D3js to display the data in a tree format and Sunburst format.

Snipe Reserch, 12 Months

Part of a project aimed at fostering connections between Ph.D. students seeking scholarships and support and industries or companies willing to offer assistance. Implemented CRUD operations to manage student profiles, the companies they applied to, and the status of their applications, all from the client side. Created a user interface (UI) that facilitated the seamless interaction and management of student profiles and application statuses.

Food Mania, 7 Months

Designed and developed webpages for the company website.

OTHER INTERESTS

Sports activities like trreking, cycling and gym.
Painting
