## PERSONAL PROJECTS

### DeepBrew

- It is a machine learning react application for displaying various analytical data and recommendations based on individual user preferences and choices. It is used by Starbucks store partners and business managers for statistical and analytical data visualization.

### My Daily

- My Daily is starbucks application for their coffee roastery to manage day to day information. It is a react application. Its backend is node js and the application is hosted on microsoft azure.

### Timesheet Management App

- A Timesheet Management application used to maintain daily employees timesheet records. It is multi tenant application developed in node js, jquery and ejs (embedded javascript). Database used is Postgres SQL and application deployed on heroku.

### Salesforce editor

- A chrome extension of salesforce editor to view, create, update and delete the visualforce pages, apex class, triggers, visualforce component. It is also having the query tool, anonymous code execution and Apex logs viewing functionality. It is developed using HTML, CSS and javascript along with chrome extension methods.

### Slack salesforce integration

- A slack salesforce integration to insert, update, query and display few data from salesforce using the botkit. Use it to display the salesforce project, task details and filter according to user command. Also add functionality to add/update the salesforce data from slack. It is built using nodejs (express) as a middleware, botkit for connecting the slack with salesforce, application is deployed on heroku.

### News Mobile Application

- A News parsing and displaying application to get the news according to region and category. Parse the news from various RSS feed links and display it on the google map according to location. It uses Node js for backend processing and react-native for android application. Database used is MongoDB and application deployed on heroku.

### Gantt chart

- Implement DHTMLX gantt chart in salesforce. Implement the functionality to save and retrieve data between gantt chart and salesforce. It is part of salesforce project management application Krow PSA.
