Kolkata

## Summary

Software Engineer with a demonstrated history of working in the information technology and services industry. Skilled in Salesforce.com Development, C++, Apex Programming, Core Java, and Java.

I am an outdoor activity fanatic who is also an avid bookworm. Favourite hobbies include swimming, hiking, and spending hours on end in a warm cozy spot reading Murakami novels.

Worked on 6+ projects implementing custom logic with the help of Apex Classes, Apex Triggers. Also familiar with creating and using Batch jobs.

Experienced with various Salesforce point and click features such as Workflows, Process Builders, Validation rules. Also familiar with the concept of profiles, roles and users provided by SFDC.

Familiar with creating basic intuitive Lightning Components, Visualforce Pages and Controllers.

Experienced in building intuitive UIs using Skuid and Javascript. Worked on 3+ projects to implement end to end integrations with various third parties using REST APIs, which provide services ranging from accounting, E-signatures, document generation, credit report filing, KYC etc. Hands on experience in integrating Conga, Docusign and other third party apps.

Responsible for creating multiple robust Portal APIs using REST services.

Familiar and experienced in working with standard data migration tool such as Dataloader.

Experienced in strictly adhering to an Agile work-model and also following the basic principles of Version Control via GIT.

Quite familiar, flexible and comfortable working with global cross-functional teams.

Knows how to directly communicate with clients, understand business requirements and suggest, implement and deliver solutions catered to their needs.

Diligent and enthusiastic learner with a can-do attitude. Graduated from Guru Nanak Institute of Technology with a bachelor's degree in Computer Science and Engineering

---

## Experience

### Q2

#### Software Engineering Contractor

January 2019 - Present (2 years 1 month)

1. Worked extensively to leverage salesforce functionalities to implement RESTful APIs for connecting and interacting with various third party systems.
2. Experienced in building robust APIs for both Visualforce pages and non-salesforce portals. Worked with lightning components, and know how basic Lightning component works.
