#### **Ongoing Major Project:**

#### **Safegrid App**

**Client:** National Grid

**Environment:** Salesforce.com, Force.com, Apex classes, LWC, GitHub, jQuery, XML, Apex triggers, SOQL, SOSL, Lightning apps, Lightning components, Process Builder, Workflows.

Safegrid's Intelligent Grid System helps locate, predict, and prevent grid faults and improve grid performance with instant-on wireless sensors and modern cloud-based monitoring and analytics. It is a Powerful solution suite for monitoring both medium voltage overhead lines and underground cables.

#### **Pulsar App**

**Client:** ABB Information System

**Technologies:** Salesforce FSL, jQuery, JavaScript, Lodash Js, Canvas Js, HTML5, CSS3.

Pulsar is an intuitive, easy to use application that lets you access your Salesforce data even offline. It's exclusively designed for Field Engineers to access the Data, through which they can create Reports and save the Checklists. It's allows Field Engineers to access their Service Appointments and data based on it.

---

### **Centrix Plus Communications Kuwait** *Lead Engineer*

**Sept 2018- Aug 2019**

- Requirement & Impact Analysis.
- Planning and Estimating for the Project
- Code Development.
- Prepare Reports and Maintain Records of Work Accomplishment.
- Develop Schedule of Project.
- Client Communication.
- Unit Testing

#### **Major Projects:**

- **Youtrients** (<https://youtrients.me>)

**Client:** The DNA Co.

**Technologies:** Opencart, PHP, MySQL, Eshipper Api, XML, Ajax **PaymentGateway:** Stripe

The portal which sells Test Kit products via clinic/clinicians through their Code. This is based on the referral system and allows customers to subscribe for their products. The customer will send back their sample after taking via kit, after receiving the sample, clinic/clinician will upload the result, the customer has been notified via email that their report has been uploaded, so they can download the report after logged in that. Payments are handled by a Stripe Account and the Shipping Partner is Eshipper.

- **Backend Dashboard for Call Centre**

**Client:** Posta Plus (A Leading Logistic Service Provider for Middle East)

**Technologies:** Yii2, Asterisk, PHP, MySQL, Vidual

This Backend provides a repository for tracking the Inbound and Outbound Calls made by agents through Vidual. Data relating to the tracking of shipments and packages will be extracted from other third-party systems to provide a single view of the tracking data. Maintain Recordings and Generate Reports from the data and it also tracks the Calling Agent Performance based on the calls handled.

---
