## Summary

I am a Certified Salesforce Administrator, Certified Salesforce Developer, ETL developer, Talend Integration Developer, Talend Admin, Oracle SQL Developer, Salesforce Data Migration/Integration Specialist. I do apex, Salesforce Admin But I Majorly help project delivery from Data Standpoint. I build Jobs to integrate Salesforce to and fro Oracle, AWS, FTP/SFTP and other legacy Systems. I have worked on Banking/Educational/Media/Cyber Security/Pharmaceuticals/NBFC projects .My job Roles for some projects brief below :

Salesforce/ETL Developer In Customer Engagement & Cyber Intelligence Company(US)- The major job included was to migrate the Data from one Salesforce instance to other Using Talend Open Studio. The Job designed was used to transfer data on any environment just by changing the credentials using the context variable in Talend.

ETL Developer in Automotive Insurance Company(Aus) - I was responsible for Integrating the Data between SQL Server and Salesforce using Jitterbit ETL tool. The integration was built to run over the cloud.

Salesforce Developer/Admin in NBFC(Ind) - The main job was to build case automation process. It include Service Cloud Components.

ETL Developer in Real State Company(Ind) - I integrated Salesforce with Oracle and AWS using Talend Open Studio . Migrated files and 50 million records. It pushes incremental data daily to oracle.

My Skills In Brief Below :

Salesforce Developer/Admin - Apex, SOQL, Rest API, Process Builder, Workflow Rules, Validation Rules, Triggers, Data Loader, Approval Process, EscalationRules, AssignmentRules, EntitlementProcess, Macros, EmailTemplates.

Talend Developer - Talend Open Studio, Talend Data Integration, Talend Cloud, Talend Admin, Building Jobs, Creating MetaData, Transforming Jobs, Context Variables, Handling Errors, Talend Components.

"I think every Salesforce consulting firm requires a Salesforce Data guy having both Salesforce and ETL expertise".
