PROFESSIONAL SUMMARY

- Team-oriented Tester considered an expert in software testing. Sharp and passionate with the understanding that every project is urgent. Pursuing a role where dedicated analysis expertise and well-developed skills will be highly valued.
- Proficient in all stages of SDLC & STLC (Test Design & Execution, Reporting & Bug Tracking).
- Developing test cases to validate the business requirements and functional specifications.
- Responsible Tester with excellent troubleshooting and reporting skills coupled with 5.5+ years of experience.
- Experience in implementing different types of testing like Functional, Regression, Retesting, Performance, Compatibility, GUI testing, Security, Cross browser.
- Hands-on experience in maintaining and running the automation scripts.
- Well versed in testing the application's compatibility in I-PAD and other wireless devices.
- Effective at working in fast-paced testing environments to review software at each stage of development and production. Able to check function, layout and operation for usability and visual design issues.
- Familiar with working in Agile-driven environments.
- Good experience in training new members of the QA team.

SKILLS

- Functional Testing
- SDLC & STLC
- Regression Testing
- Database Testing
- Creating Test Cases as per requirements/specifications.
- Reporting bugs using tools like JIRA & Azure.
- Resource allocation and training new team members.
- Managing team performance and progress
- Web application testing/GUI testing
- Mobile application Testing (Android & iOS)
- Agile methodology
- Reporting and analysis
- Attended agile meetings with offshore stakeholders to understand the project requirements.
- Excellent communication skills
- Familiar with API Testing in POSTMAN tool.

NowCom Global Services - Mid QA Engineer 1, July 2019 to Current date

- Working in sprint along with developers, QA and scrum master following Software Development Life Cycle using Agile-Scrum methodology.
- Followed Build-Test-Deploy approach to deliver projects by collaborating and testing the Dealer center mobile app from build through deployment process.
- Testing different modules of Dealer center mobile app in different platforms like Android and iOS in different staged environments: Development, Integration, Staging, Production.
- Performing Manual and Automated Testing. Worked with automation team to help automate test cases
- Executing automated scripts to ensure bug free modules in the DealerCenter Mobile app.
- Perform Functional Testing, Regression Testing, Acceptance Testing, System Integration, Load/Performance testing, Database Testing, Cross-browser compatibility in DC Mobile app and website.
- Report problems in the applications using bug tracking software such that solutions can be reproduced, scheduled and prioritized.
- Experience with testing and tracking tools like Microsoft Visual Studio and Azure.
- Assist with developing test plans and ensure 100% test coverage and execution.
- Work with the product team on user acceptance testing.
- Follow up with developers for proper bug fixes and help enhance bug fixing.
- Find bugs and report them with focus on technical and supporting details.
- Executing SQL queries in database to ensure data sync with DC Mobile app.

FactSet Systems India Private Limited, Hyderabad.

1. QA Analyst II / Acting Team Lead, September 2018 to July 2019

- Work closely with QA Managers, Product Developers and Product Managers to swiftly resolve faults.
- Work with PO and Scrum Master, participating in the complete product development life cycle.
